Etude des risques

Objectifs d'assainissement

Analyse des risques résiduels

VS

## Comité de décision S-Risk

### Composition

4 co-propriétaires (Wallonie + Flandre + Bruxelles-Capitale + GD Luxembourg )

### Organe de décision

- Approbation des modifications techniques/scientifiques proposées par le comité scientifique
- Toute décision modifiant l'orientation de l'outil et la collaboration entre propriétaires

## Comité scientifique S-Risk

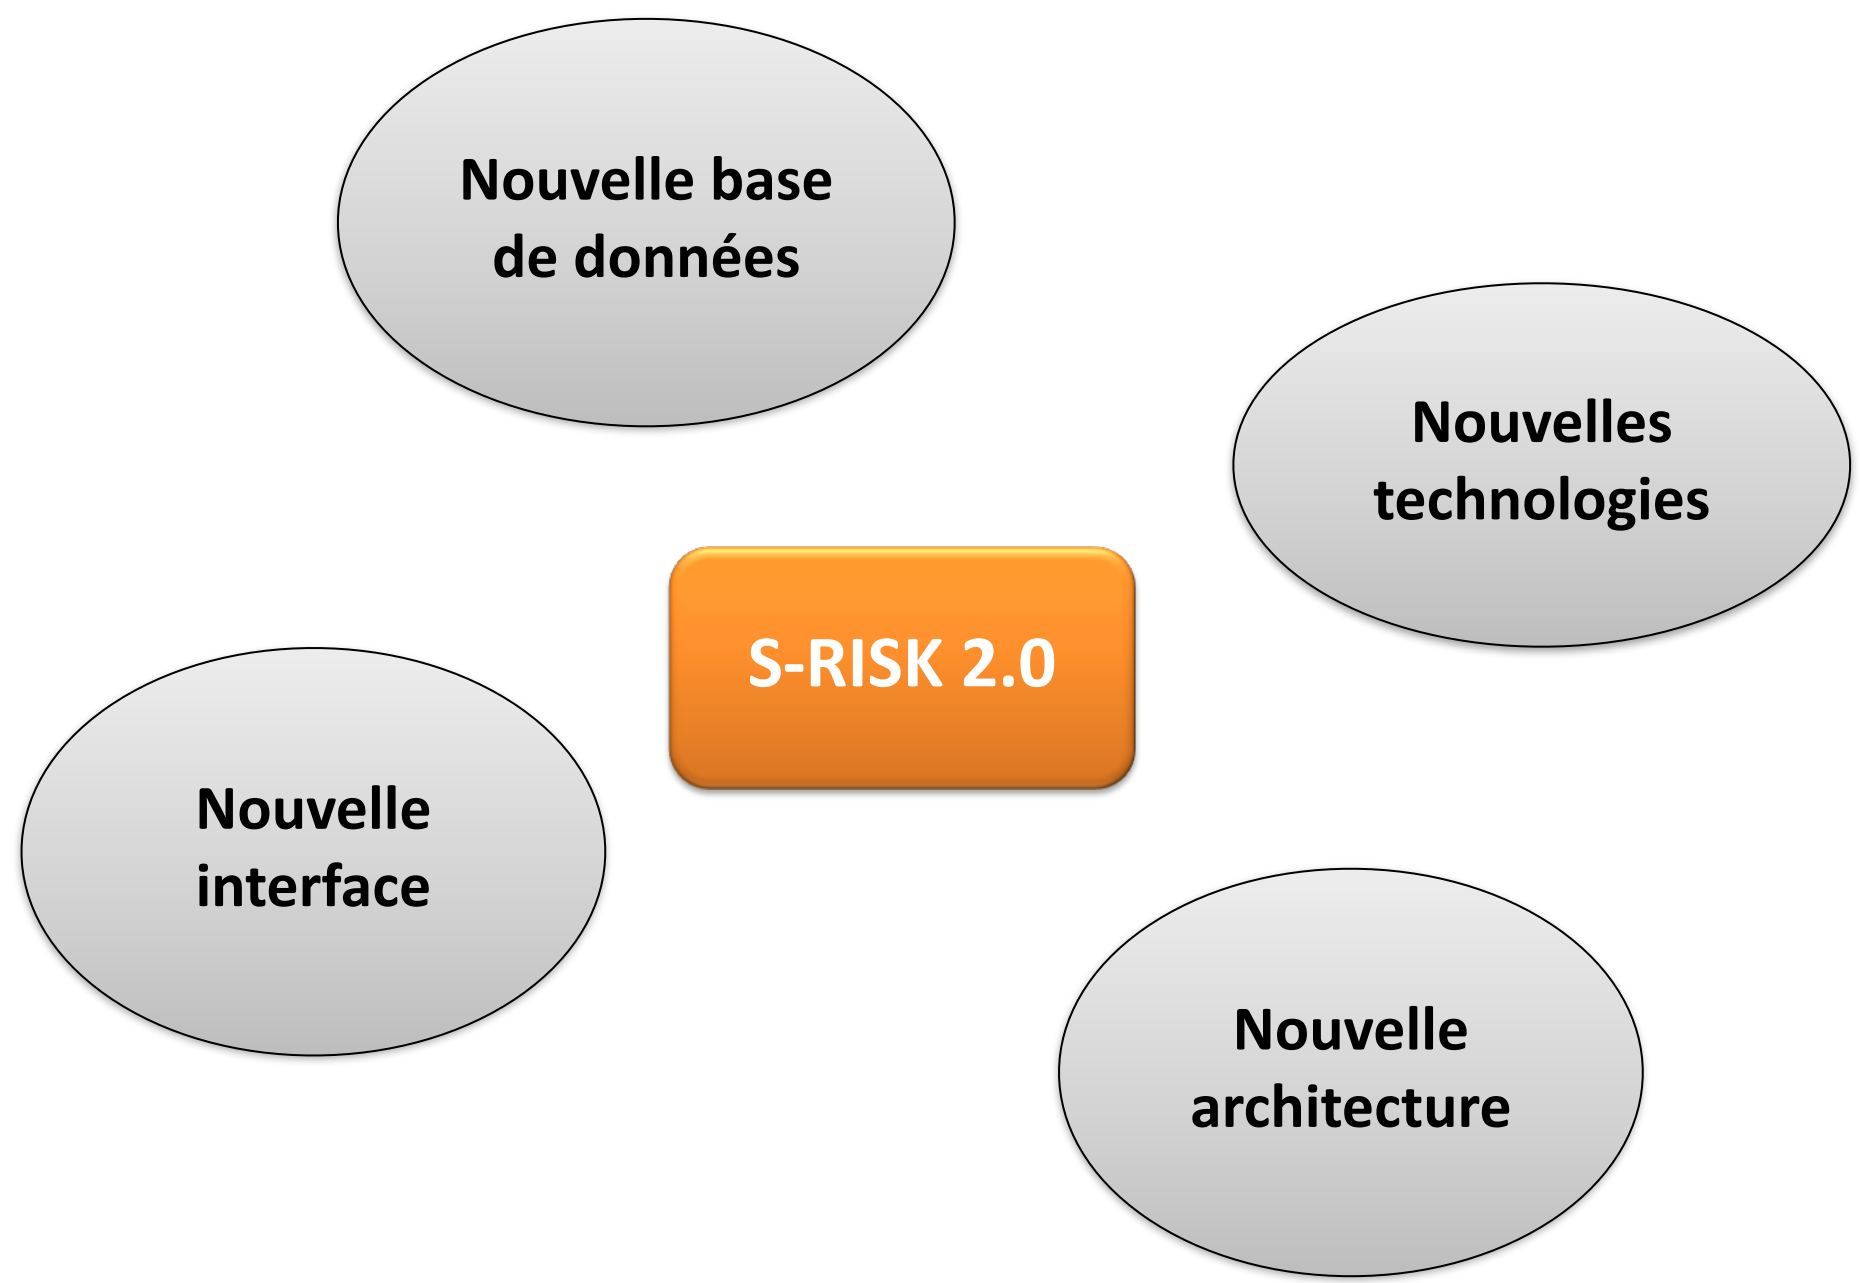

### Composition

- 4 co-propriétaires
- SPAQuE
- Max. 2 experts par co-propriétaire
- Experts supplémentaires ponctuels

### Organe de proposition

- Analyse des améliorations scientifiques et/ou techniques possibles
- Rédaction des propositions destinées au comité de décision

Base du fonctionnement = accord de co-propriété signé en 2021 entre les 4 co-propriétaires

SIMULATION SUMMARY

New Copy

**Name** 573 - compl EC 2

**Label** HCOV 1&3 - V - sans vide ventilé

**Description** Simulation HCOV1 et HCOV 3 en scénario industriel léger avec bâtiment sans cave ni vide ventilé

**Application type** II: Soil specific risk assessment

**Chemicals** Tetrachloroethene,c-1,2-Dichloroethene

# 573 - compl EC 2

Enable expert mode Close simulation

Label: HCOV 1&3 - V - sans vide ventilé  
 Description: Simulation HCOV1 et HCOV 3 en scénario industriel léger avec bâtiment sans cave ni vide ventilé  
 Application type: 2

Scenario Chemical Soil Water Outdoor air Indoor air Plants Animals Concentrations Exposure Risk Concentration limits Results Graph

## Concentrations

Selected chemical **Tetrachloroethene**

Selected soil layer **Standard remblai**

### Soil concentrations

Concentration (mg/kg) **2.3e+0**

### Groundwater concentration

Concentration in groundwater (µg/l) **8.342154648e+2**

### Pathway-specific soil concentrations

Soil - contact & resuspension (mg/kg dm)  use scientific notation with

Soil - drinking water (mg/kg dm)  use scientific notation with

Soil - plants (mg/kg dm)  use scientific notation with

Soil - animals (mg/kg dm)  use scientific notation with

### Animal-related concentrations

Background concentration in pasture grass (mg/kg dm) **0e+0**

Background concentration in silage grass (mg/kg dm) **0e+0**

Background concentration in maize (mg/kg dm) **0e+0**

Concentrate concentration (mg/kg dm) **0e+0**

Feed mixture concentration (mg/kg dm) **0e+0**

Other water concentration (µg/l) **0e+0**

### Concentrations in transfermedia

Outdoor air gas phase (mg/m³)  use scientific notation with

Outdoor air PM10 (mg/m³)  use scientific notation with

Outdoor air total (mg/m³)  use scientific notation with

Indoor air gas phase (mg/m³)  use scientific notation with

Indoor air PM10 (mg/m³)  use scientific notation with

Indoor air total (mg/m³)  use scientific notation with

Outdoor air gas phase (mg/m³)  use scientific notation with

Soil air ambient (mg/m³)  use scientific notation with

Indoor settled dust (mg/kg dm)  use scientific notation with
